

Analytics

Optimize. Predict. Uncover.

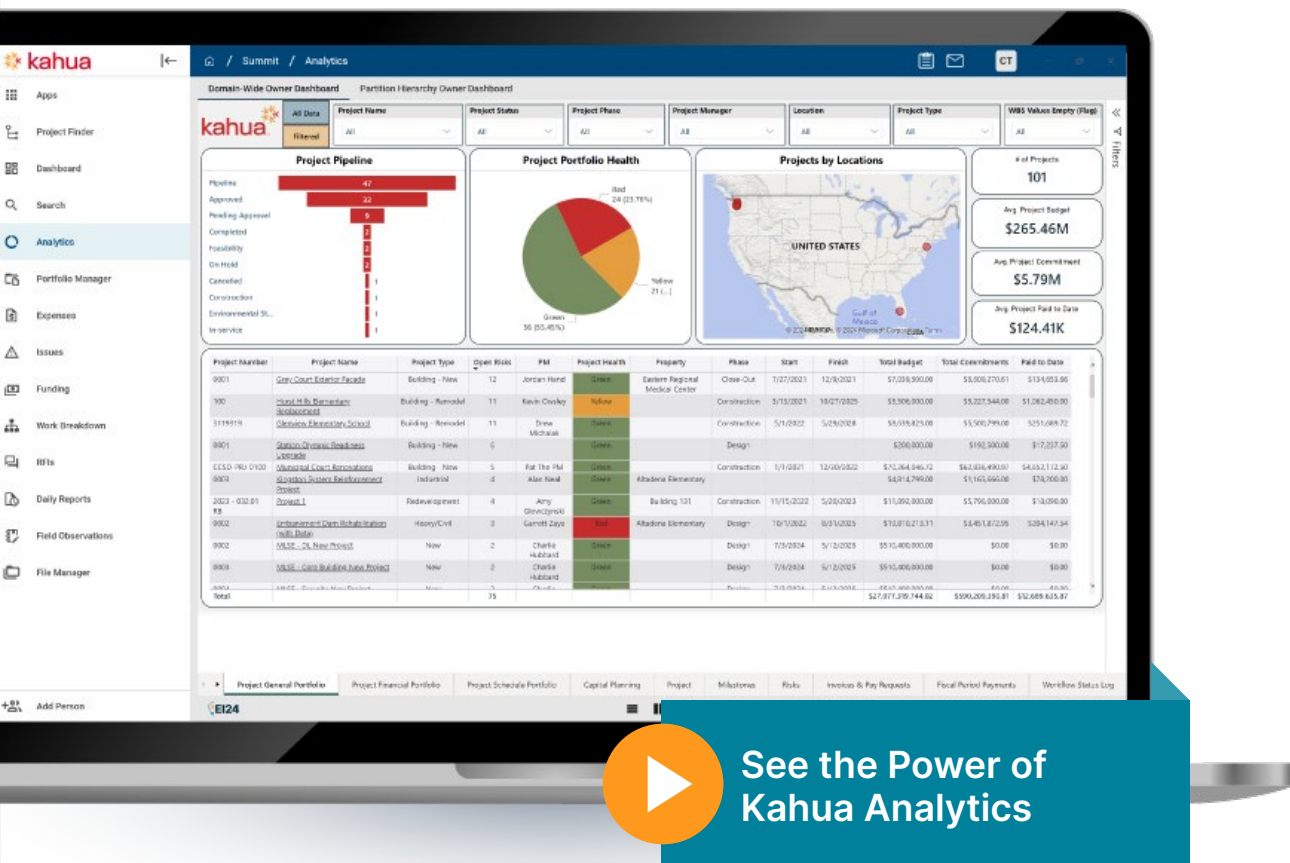

Construction teams often struggle with outdated and incomplete data, hindering their ability to access real-time insights. Dashboards designed specifically for the construction industry empower teams to view data effectively, from individual projects to entire portfolios. These tailored tools enable strategic decision-making, mitigate risks and help prevent delays and cost overruns, ensuring projects stay on track and within budget.

Customized Dashboards

Actionable Insights

Public & Stakeholder Transparency

PowerBI Embedded in Kahua Platform

See the Power of Kahua Analytics

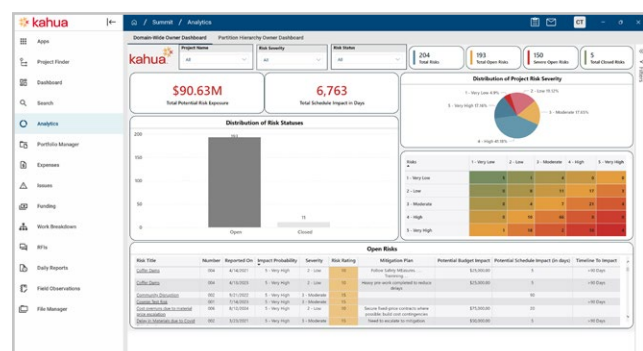

Reimagine how you Visualize your Project Data

Transform your data into powerful insights for smarter decisions throughout the project lifecycle. With Kahua Analytics, explore pre-built dashboards designed around industry best practices and create fully customized dashboards tailored to the specific needs and strategic goals of your construction team.

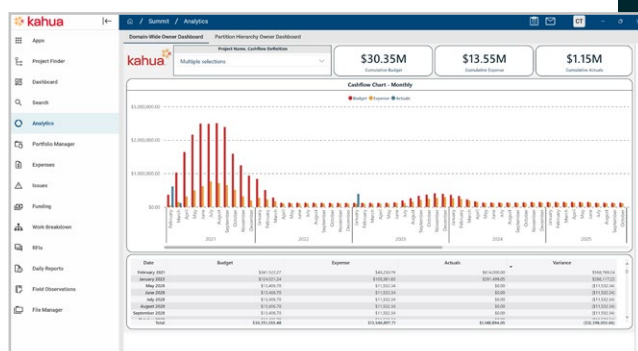

Kahua Analytics, powered by *Microsoft PowerBI**, empowers you to unlock the full potential of your project data, keeping your team informed and agile in responding to challenges.

*No separate PowerBI license required – it's included with your Kahua Analytics subscription.

How Kahua Analytics is Driving Growth and Efficiency

“When we signed up to build out Floor & Decor’s analytics, we expected to get insights into a few important, focused areas about our construction timelines and financials. What we didn’t expect is how Kahua Analytics was able to reveal to us just how many other areas can suddenly be visualized and tracked in depth to accomplish that goal.

I’ve personally worked with the Kahua Analytics team to build out inward-facing dashboards to determine time-to-completion metrics for individual steps in our workflows for approvals, which address delays, expedite project timelines and keep the wheels greased and turning smoothly.”

– Austin Buege, Senior Manager – Real Estate Consolidated Systems, Floor & Decor

“Just imagine, you’re disconnected from the project level. You’re in executive management and you can go in and drill down to a region, to a project, to a phase and our phases are where the construction contracts happen and pull the dashboard for that, the project card for that and see what’s going on. Anyone can do that at any level. That’s extremely powerful.”

– Federal Entity

“Our first goal is getting information out to the public, making sure that we can see all the schools and what’s going on with those schools.

That is important because you’re dealing with taxpayers’ dollars, so transparency is key. Kahua Analytics allows us to do that. This is just as important when you are going out for another bond, you have to be transparent and show them how their dollars are being spent.

Before Kahua Analytics reports like this would take weeks to compile and by the time they were presented, the data was outdated. I can now pull this data in dynamic dashboards with a simple key stroke”

– Cheri Chenoweth, Coordinator Facilities Business & Compliance, San Juan Unified School District
